

Preventive *Boost*

Routine care that doesn't count against your benefit maximum

At HRI, we encourage our members to receive the recommended routine care that ensures their healthy smiles. That's why we offer **preventive boost**. This benefit encourages members and their families to get their routine preventive dental care.

Let's help members get more out of their dental benefits.

Plan payments for all covered services continue to apply to the member's plan annual maximum benefit except for routine, diagnostic and preventive dental care and services. These include:

- Periodic oral evaluations.
- Periodic oral cleanings.
- Bitewing X-rays.
- Fluoride treatments.

Please note: Not all covered services under the preventive and diagnostic CDT codes are exempt from the plan annual maximum benefit. Only those relating to routine preventive dental care qualify.

Plan limitations, restrictions and exclusions continue to apply to preventive care under this plan feature.

This plan feature is not standard, but available upon request. In addition, it is not available with HRI wellness rewards program.
