

Yeast Antifungal Susceptibility In-house Testing Resumes

Notification Date: September 3rd, 2026
Effective Date: September 10th, 2026

Yeast Antifungal Susceptibility in-house testing will resume September 10, 2026, using the Sensititre YeastOne YO4IVD testing platform.

This in vitro diagnostic (IVD) platform features an expanded antifungal panel, enabling more comprehensive detection and reporting of *Candida* species susceptibility and resistance.

Antifungal Agent	Species
Caspofungin	<i>C. albicans</i> , <i>C. glabrata</i> , <i>C. tropicalis</i> , <i>C. krusei</i> , <i>C. parapsilosis</i>
Micafungin	<i>C. albicans</i> , <i>C. glabrata</i> , <i>C. tropicalis</i> , <i>C. krusei</i> , <i>C. parapsilosis</i> , <i>C. guilliermondii</i>
Fluconazole	<i>C. albicans</i> , <i>C. glabrata</i> , <i>C. parapsilosis</i>
Voriconazole	<i>C. albicans</i> , <i>C. tropicalis</i> , <i>C. krusei</i> , <i>C. parapsilosis</i>

Based on specimen source and identification of yeast, not all antifungals included on the YO4IVD panel will be reported.
