New and Updated Allergy Panels – Test Update

Notification Date: September 11, 2026
Effective Date: September 14, 2026

To improve diagnostic evaluation and streamline allergy testing, several allergy panels have been added or updated and are now available for ordering. These updates are intended to enhance diagnostic accuracy and provide more comprehensive allergy assessment for patient care.

New: Stinging Insect Allergy Panel (LAB3581)

- Honeybee (A. mellifera)
- Common wasp, yellow jacket (Vespula spp.)
- Paper wasp (Polistes spp.)
- White-faced hornet (D. maculata)
- Yellow hornet (D. arenaria)

Updated: Respiratory Panel (LAB1307)**, Childhood Panel** (LAB2327)**, and Basic Respiratory Panel** (LAB1379)

New functionality:

- Positive results for **Dog (E5)** and/or **Cat (E1)** allergens will automatically reflex to component testing for additional characterization and clinical insight.

Updated: Basic Food Reflex Panel (LAB1305)

Now Includes:

- nGliadin IgE (F98)
- Sesame Seed IgE (F10A)

New functionality: Positive results for the following allergens will automatically reflex to the component testing:

- Brazil nut (B. excelsa)
- Cashew nut (A. occidentale)
- Cow's milk (B. taurus)
- Egg white (Gallus spp.)
- Hazelnut (C. avellana)
- nGliadin (Gluten formation, Wheat)
- Peanut (A. hypogaea)
- Sesame seed (S. indicum)
- Walnut (Juglans spp.)
- Wheat (T. aestivum)
