

PROMEDICA

HEART INSTITUTE

2025

ANNUAL

REPORT

ProMedica Heart Institute has the largest and most experienced, board-certified team of interventional, electrophysiology, pediatric and general cardiologists working together with our nationally recognized open heart and thoracic surgeons in the region. Our collaborative network of experts ensures patients get high-quality, standardized care at any one of our hospitals, physician offices and outpatient facilities. As a leader in innovative heart care, we continue to provide our communities with the latest available treatments for heart conditions close to home. Continuing to experience significant growth, below is a snapshot of ProMedica Heart Institute’s performance in 2025.

Patient Data

Number of patient encounters

Cardiac Testing

219,997

cardiac tests

2,719

CT scans

705

heart flow testings

689

MRIs

Cardiac Invasive Procedures

5,794

cardiac catheterizations and structural heart interventions, including:

WATCHMAN™

MitraClip™

CardioMEMS™

AngioVac

354

ST-elevation myocardial infarction (STEMI) heart attacks treated

Total Electrophysiology (EP)

3,321

electrophysiology procedures

889

cardiac device implants

976

ablations

1,456

other procedures

Total Cardiothoracic Surgery

1,131

cardiothoracic procedures

Structural Heart

212

transcatheter aortic valve replacement (TAVR) procedures

Cardiac Rehab

35,039

cardiac rehab patient encounters

Virtual Encounters

3,990

Improved Access

- ProMedica Physicians Cardiology saw **15,665** new patients
- Hired **1 new cardiothoracic surgeon** with special training allowing for advanced arch interventions
- ProMedica Physicians Cardiology** added **6** new cardiologists and **6** new advanced practice providers
- 4** heart failure clinics (Toledo, Oregon, Fremont, Monroe) had **8,279** heart failure encounters

Technology

Technology and New Procedures include:

Total arch replacement

Frozen elephant trunk

Commando operation

Alternative access transcatheter aortic valve replacement (TAVR)

TAVR explant with aortic valve replacement (AVR)

Valve sparing aortic root placement (David procedure)

B building VAD (ventricular assist device) program

Research

Cardiothoracic Surgery

7 clinical trials in progress

38 patients newly enrolled

242 follow-up research visits

1,779 patients screened

Cardiology

7 clinical trials in progress

33 patients newly enrolled

39 follow-up research visits

2,831 patients screened

Community Engagement

Toledo Heart Walk

\$22,287

raised

552

ProMedica employees participated

Highlighted Initiatives

24/7 Cardiology at Toledo Hospital

4,803

people came to the ER with chest pain and 2,064 were admitted for further heart care

Providers

85

heart care providers
