

Post Graduate Year 2 Specialty Residency: Critical Care Pharmacy
ProMedica Toledo Hospital/Russell J. Ebeid Children's Hospital
Toledo, OH
ASHP code: 44099

Purpose

PGY2 pharmacy residency programs are built on Doctor of Pharmacy (PharmD) education and PGY1 pharmacy residency programs to contribute to the development of clinical pharmacists in advanced or specialized practice. PGY2 residencies provide residents with opportunities to function independently as practitioners by conceptualizing and integrating accumulated experience and knowledge and incorporating both into the provision of patient care that improves medication therapy. Residents who successfully complete an accredited PGY2 pharmacy residency should possess competencies that qualify them for clinical pharmacist and/or faculty positions and position them to be eligible for attainment of board certification in the specialized practice area (when board certification for the practice area exists).

The PGY2 critical care pharmacy residency program at ProMedica Toledo Hospital/Russell J. Ebeid Children's Hospital is committed to the recruitment, training, and support of Black, Indigenous, and People of Color (BIPOC) and from all diverse backgrounds and experiences. This residency site agrees that no person at this site will solicit, accept, or use any ranking-related information from any residency applicant.

Description

The PGY2 critical care pharmacy residency program at ProMedica Toledo Hospital (PTH) is designed to provide advanced training in a variety of practice settings involving the management of the critically ill. Following completion of the program, the graduate will possess the skills necessary to function independently as a competent and confident pharmacy practitioner.

ProMedica Toledo Hospital, a 794-bed tertiary care hospital in northwest Ohio, is a regional center for trauma, cardiology, neurology, intensive care, oncology, obstetrics, and gynecology. Russell J. Ebeid Children's Hospital, a 151-bed hospital within a hospital, is a regional pediatric center for general pediatrics, cardiology, pulmonology, neurology, intensive care, hematology, oncology, and neonatology. PTH offers a 52-week critical care residency with required experiences in medical ICU, surgical ICU, cardiac ICU, neuro ICU, and emergency medicine.

Number of positions available: 1
