

What will you do with
the *next* hundred years?

Icaria's precision wellness programs challenge traditional healthcare approaches – focusing on risk assessment, early detection and interventions to optimize energy and vitality.

**At Icaria, our mission is to improve the trajectory
of your aging.**

Life expectancy that's *well beyond* your expectations.

Icaria views aging as a disease that can be treated. Age-related decline can be challenged rather than accepted. Let Icaria help navigate your journey to optimal health and vitality.

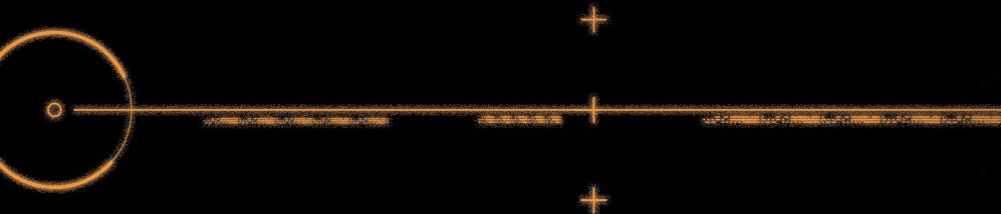

Pillars of care.

Precision Diagnostics

With methods like advanced MR and CT imaging, we examine your body millimeter by millimeter to identify diseases at an early stage when treatments can be more effective.

Performance Optimization

Icaria's comprehensive exams give clients an unprecedented view of their biology. Using this baseline knowledge, we identify specific accelerants of aging and help navigate a journey towards increased vitality and longevity. We continue to track key biomarkers of aging to demonstrate the impact of interventions or course correct to optimize your health trajectory.

Your *visit.*

With any service package you choose, you'll experience Icaria's proactive, preventive care philosophy in a luxury setting.

Icaria is not a typical provider's office. And the Icaria experience is not a typical medical visit. From the moment you walk through our doors, you'll experience advanced personalized medicine with white glove hospitality.

Icaria's brand new, two-story facility was designed with your experience in mind. Our modern, spa-like aesthetic offers a peaceful environment where you can focus on your health and well-being.

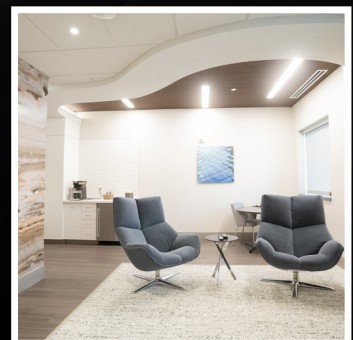

Our facility on the Wildwood Medical Center campus features a full-service imaging center and a second level exclusively dedicated to client comfort. We offer private client suites, fitness room and more.

When you arrive, you'll meet your personal concierge, who will serve as your guide throughout your visit and ensure that your experience exceeds your expectations.

You will be assigned to your own private suite – a beautiful space with hospitality amenities, including a relaxing living space, quiet working area, and private restroom. Plus, you'll have an attached exam room for convenient visits with your providers.

Throughout your Icaria visit, you'll experience high-quality personal connection and high-touch interaction. From the ProMedica provider who performs your physical exam to the exercise physiologist who consults you on your fitness goals, you will be treated with the highest level of care.

At every visit, you'll have 1:1 engagement with an Icaria ProMedica Physician, who will lead the full scope of your care journey with us. Whatever the outcome of your diagnostics or your personal health goals, our team of clinical experts are well connected to any specialty services you may need. You will not be left to navigate your health journey alone.

Well beyond an executive physical.

Well beyond ordinary healthcare.

Well beyond everything you
thought was possible.

Icaria. Well beyond.

Unlock your full potential for health and vitality today.
